

"The Chlorine Dioxide People"

Providing you with chlorine dioxide solutions for your decontamination needs

CSI 3000™ Liquid Chlorine Dioxide Concentrate

CSI 3000™ is EPA-registered (#75757-2) pure chlorine dioxide concentrate. No on-site mixing or "activation" is required, just dilute from the 3000 ppm to your use concentration. It is used to control microorganisms in food, research, production, pharmaceutical and agricultural applications. It is easier to apply, safer to handle, and more effective than chlorine or bromine-based products.

FEATURES & BENEFITS

- Pure chlorine dioxide in water
- Concentrated: 3000 ppm (0.3%)
- DOT-approved for transport
- No "activation" required
- No on-site chemical mixing
- Storage stable at room temperature
- Applied by simple chemical feed pump
- Maintains efficacy at pH up to 9
- Rinses clean; no residue

APPLICATIONS

- Commercial potable water systems
- Recirculating cooling water systems
- Air washers and scrubbers
- Food & beverage processing plants
- Industrial pasteurizers
- Heat transfer systems
- Agricultural applications
- Membrane cleaning

STORAGE & HANDLING

When not in use, keep containers tightly closed in a dark, dry place away from extreme temperatures. This product is to be used as directed within 9 months of the manufacture date indicated on the label. Do not reuse or refill this container.

Available in 5 Different Sizes

- 5 Gallons
- 15 Gallons
- 30 Gallons
- 55 Gallons
- 275 Gallons
