

“The Process and Benefits of Chlorine Dioxide Gas for Decontamination in the Food, Pharmaceutical, and Life Science Industries”

A FREE WORKSHOP FOR ALL INDUSTRIES CONCERNED WITH MICROBIAL CONTAMINATION

This educational workshop will explore the various methods of disinfection and sterilization available, allowing you to make informed decisions when reviewing your contamination control plan. Focus will be given to chlorine dioxide gas, which is at the forefront of keeping facilities cleaner and safer than ever, as well as UV-C light disinfection.

WORKSHOP AGENDA HIGHLIGHTS

- Comparison of decontamination technologies
 - Safety
 - Efficacy
 - Advantages/Disadvantages
- Exploration of various applications
- Case Studies
- Products
- Food Safety

WHO SHOULD ATTEND?

Anyone working with or in a critical environment where contamination control is essential; including QA/QC, lab managers, microbiologists, validation scientists, lab planners, production engineers, food safety professionals, and EHS.

WHEN?

Tuesday, June 5 2018
8:30AM - 2:00PM
(breakfast and lunch included)

WHERE?

Atlanta Marriott Century Center/Emory
2000 Century Blvd NE
Atlanta, GA 30345
Off I-85 in northeast Atlanta

HOW TO REGISTER

There are 3 FREE and EASY ways

- 1) Email workshop@clordisys.com with the names of those attending
- 2) Call 908-236-4100
- 3) Sign up at clordisys.com/workshops

CE Credits are available for the AALAS, ABSA and IFT organizations
