

We invite our colleagues in the Food Industry to join us for

## Using Chlorine Dioxide Gas to Combat Recurring Pathogens and Improve Your Overall Food Safety

### A Free Workshop on Contamination Control

This educational workshop will discuss how chlorine dioxide gas is being used within the food manufacturing industry to keep facilities cleaner and safer than ever before by providing the most effective method of decontamination possible and eliminating the persistent pathogens in the hard-to-reach areas. The impact that improved sanitation has on an environmental program and other auxiliary benefits will also be discussed. Case studies and applications will be explored in detail as well.

#### Topics covered at this workshop include:

- Comparison of chlorine dioxide gas to traditional sanitation methods
  - Safety
  - Efficacy
  - Material Compatibility
- Exploration of various applications
- Case Studies
- Products
- Food Safety Benefits

#### WHEN

Wednesday, May 24, 2017  
9:00 am - 2:00 pm  
(breakfast and lunch included)

#### WHERE

Courtyard Birmingham Colonnade  
4300 Colonnade Pkwy  
Birmingham, AL 35243

#### REGISTRATION

It's free, with 3 ways to sign up!

- 1) Email [workshop@clordisys.com](mailto:workshop@clordisys.com) with the names of all members of your party attending.
- 2) Call us at 908-236-4100
- 3) Sign up online at:  
[www.clordisys.com/workshops](http://www.clordisys.com/workshops)

#### WHO SHOULD ATTEND

This workshop is designed for anyone working with or in a critical environment where contamination control is essential; including QA/QC scientists, lab managers, microbiologists, validation scientists, architects and lab planners, production engineers, food safety professionals, EHS officers, and more

Unable to attend, but interested in the program?
