

"The Chlorine Dioxide People"

Providing you with gaseous chlorine dioxide solutions for your decontamination and sterilization needs

CD Cartridge Set

Description:

The CD Cartridge Set is specifically designed to work with the Clordisys chlorine dioxide gas generation systems. Using Sodium Chlorite as the active ingredient, it converts reagent gas (2% chlorine / 98% nitrogen) to high purity chlorine dioxide gas using a unique solid phase reaction.

Each CD Cartridge has a 4" diameter and is 18" long and weighs 7 pounds. Rubber caps are attached to each end and the CD cartridge is sealed in plastic to ensure proper storage.

Storage temperatures must not exceed 85° F (30° C).

EPA Registered Sterilant (EPA Registration No. 80802-1)
