

SjN presents

VIVARIUM TECHNOLOGIES WORKSHOP: Equipment and Services to Improve Efficiencies

A Free Workshop for Life Sciences Professionals

Learn about the sterilization, decontamination, and cleaning technologies available for animal housing, rooms, and complete facilities. Additionally, see what products are available for housing large animals, and understand the benefits of companies that provide turnkey services for design and construction activities.

“Contamination Control using Chlorine Dioxide Gas and Ultraviolet Light”

Evaluate how to disinfect or decontaminate rooms as well as parts and components entering or leaving a vivarium. Applications include electronics, cellphones, and pinworm eradication.

Paul Lorcheim, ClorDiSys Solutions

“The Products, Features and Options that won’t Make Cage Wash a Dirty Word”

Don Basil, Lynx

“Large Animal Housing to Isolation Cubicles and Prefab Buildings”

With a focus given to LGL Animal Care Products

Andy Gerwig, SjN

“Split Bulk Challenge”

Egress for a large bulk replacement sterilizer can be a challenge. We have the solution.

William Purvis, Beta Star Life Science Equipment

“One Man to Holler At”

The benefits of a one-stop approach to handling construction projects

Dennis Flynn, Modular Component Systems

WHEN?

Wednesday, October 2, 2019

9:00AM - 3:00PM

continental breakfast and lunch included

WHERE?

Holiday Inn Lansdale - Hatfield

1750 Sunneytown Pike

Kulpsville, PA 19443
